## COMPACT laminate

As the consummate, long-lasting, low-maintenance, decorative panel, **polytec's** Compact laminate is a go-to product for the most demanding professional interior and external joinery environments.

Being manufactured from quality materials embeds **polytec's** Compact laminate with excellent technical characteristics. It's totally impervious to water and has outstanding impact, stain and wear resistance, along with excellent hygienic properties.

Characterised by a distinctive black core, Compact laminate holds extra appeal on the aesthetic front and as a structurally sound material.

The introduction of Smooth and Woodmatt finishes into **polytec's** Compact laminate range avails exciting new design possibilities for commercial projects. **polytec's** Smooth finish is a sleek, flat surface with minimal reflectance available in a range of stone patterns. **polytec's** ever-popular Woodmatt finish has been introduced to the range, allowing for greater design flexibility with a realistic woodgrain feel in timber designs and a new solid, Cinder Woodmatt.

## ENVIRONMENT & SUSTAINABILITY

**polytec** is committed to an eco-friendly and sustainable environment. It is an intrinsic part of the way we do business daily. Our decisions are made so that they have minimum negative impact on the environment.

We manage waste responsibly through numerous recycling programs including aluminium and metals, used oils and timber waste is recycled back into packaging and energy. We subscribe to local government environmental initiatives and voluntary audits as well as our own internal Energy and Carbon Management Policy (ECM), which aligns with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our national portfolio of facilities boasts a total of almost 54,000 solar panels with 17.66 million solar kWh generated, the equivalent of 7,377 trees planted saving close to 12,000 tonne of CO2 emissions. The Oberon facility is now Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop. **polytec** continues to improve on sustainability measures in order to build a circular economy and better future for all.

**polytec** doors and benchtops are certified Australian Made & Owned.

## CARE & MAINTENANCE

The surface of **polytec**'s Compact laminate is made from a stain-resistant melamine based resin. The toughness and high impermeability of this surface means that **polytec**'s Compact laminate should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common household spills.

For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful surface for many years.

Visit [www.polytec.com.au](http://www.polytec.com.au) for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [www.polytec.com.au](http://www.polytec.com.au).

**polytec** swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit [www.polytec.com.au](http://www.polytec.com.au).

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
