WARDROBE

polytec's Wardrobe range comes in a variety of styles and finishes, and is the quintessential ingredient when it comes to organising belongings and items such as clothing, shoes, jewellery and more. **polytec** supplies a wide range of affordable wardrobe solutions that will suit all budgets, while utilising luxurious colours and finishes to elevate your wardrobe. Choose from our decorative and durable Melamine board, striking Aluminium framed glass doors, the Ravine range or the new 25mm Surano doors.

To give your wardrobe distinctive character, our range offers an extensive variety of colour and decorative finish options, including Texture, Matt, Ashgrain, Ravine, Woodmatt, and the new Smooth range, adding a modern touch to any space.

The Woodmatt finish offers a subtle woodgrain embossing with an overall matt surface to look and feel like a true veneer, setting a benchmark in Australian Made door and panel manufacturing.

polytec's Ravine range showcases the best natural touch timber surface lightly coloured with warm and inviting shades.

polytec's latest Smooth finish is made to reflect a soft, painted finish with slight reflectance values, perfect for contemporary homes. The new Smooth finish enhances the importance of texture and feel with a range of solid, neutral colours that are grounding and calming.

The new 25mm Surano door range is available in a variety of woodgrain and solid colour options, and are manufactured using 25mm MDF with 130mm wide stiles and rails with a 9mm MDF infill panel. This shaker style door will create an element of luxe character, enhanced by the selection of either Woodmatt, Ravine, Matt or Smooth finishes, adding a modern touch to any space. Opt for the latest Fluted Glass inserts for added textural interest when paired with Surano doors.

At **polytec**, we strive to provide beautifully crafted decorative surfaces of unmatched quality. With an outstanding array of colours, styles and finishes, the **polytec** range of products offers you the perfect solution for all of your storage requirements.

Dark coloured surfaces will show fingerprints and require more care and maintenance than lighter coloured surfaces. It is recommended to test a product sample prior to colour selection.

ENVIRONMENT & SUSTAINABILITY

polytec is committed to an eco-friendly and sustainable environment. It is an intrinsic part of the way we do business daily. Our decisions are made so that they have minimum negative impact on the environment.

Our product is manufactured from managed and renewable plantation pine, and on request can be purchased as Responsible Wood Chain of Custody certified. All polytec board products are manufactured from E0 or E1 MDF, with particleboard now made from a percentage of recycled wood material.

We manage waste responsibly through numerous recycling programs including aluminium and metals, used oils and timber waste is recycled back into packaging and energy. We subscribe to local government environmental initiatives and voluntary audits as well as our own internal Energy and Carbon Management Policy (ECM), which aligns with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our national portfolio of facilities boasts a total of almost 54,000 solar panels with 17.66 million solar kWh generated, the equivalent of 7,377 trees planted saving close to 12,000 tonne of CO2 emissions. The Oberon facility is now Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop. polytec continues to improve on sustainability measures in order to build a circular economy and better future for all.

polytec doors and benchtops are certified Australian Made & Owned.

CARE & MAINTENANCE

polytec do not recommend the use of Melamine products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted.

Your polytec doors and panels are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

polytec doors and panels should be cleaned by wiping down with a damp soft cloth and warm soapy water. Followed by drying using a soft or microfibre cloth so as not to leave any residue on the door or panel. For more stubborn stains use a good quality streak free glass cleaner. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit www.polytec.com.au for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit www.polytec.com.au.

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and polytec recommend testing a sample for fingerprint resistance and ease of cleaning. polytec does not guarantee exact colour matches across product ranges due to colour variation in each product group.
